

## Heart Screening Event – October 2026

On 10<sup>th</sup> & 11<sup>th</sup> October 2026, **Cardiac Risk in the Young** returned to our area to screen the hearts of more local young people in memory of Jamie.

This screening event was our last scheduled session and saw the team screen **193 young people** with the CRY Cardiologist in attendance reviewing every ECG tracing and speaking with each person to discuss their results. Jamie's legacy has screened an amazing **3,412** young people in ten years!

As is usual, a handful of young people who attended were referred for a follow up with their GP or further tests with regards to age or symptoms/family history. We wish them well going forward.

**October 2026 group photo with the full CRY team and the Lancaster family.**

Sadly, as previously announced, this was our last scheduled screening after 10 years offering the events in memory of Jamie. As much as we'd like to continue they are emotionally draining and the memorial fund is fully spent, so we have taken the decision to step back for a while.

We are beyond humbled at the support we have been shown since losing Jamie. Your fundraising and donations have enabled these screenings to take place, so we thank each and every one of you.

*National CRY statistics from over 20 years of screening show that 1:100 people screened will have an irregularity with their heart and 1:300 will have a potentially life-changing issue.*
